Introduction

Phonetics For Fanatics is a series of pencil puzzles designed for students of English as a Second Language. The text adapts familiar puzzle types (i.e. word searches, kriss-krosses, and cryptograms) to the International Phonetic Alphabet, so that the puzzles' emphasis is on the sounds of English, as spoken by modern British speakers.

The text has been designed with Pre-Intermediate to Upper-Intermediate students in mind, and the puzzle types have been arranged in difficulty from the most basic (word searches) to the most complex (kriss-krosses). In addition, the individual puzzle types have been arranged in order of difficulty so that, for example, the first phonetic anagram puzzle is the easiest, while the sixth and last is the hardest.

The puzzles can be used individually as supplements to lesson plans or collectively as an extended educational pastime for the solitary student of English as a Second Language. A student who completes the entire book will have become familiar with the phonetic spellings and pronunciations of approximately 1400 words.

Word Search One – The Weather

At the bottom of the page you have a list of thirty-three words that are concerned with the weather. Hidden in the block of phonetic letters in the middle of the page are the phonetic spellings of the words on the list. Circle the phonetic spellings of the words as you find them in the puzzle. The spellings can appear horizontally (← →), vertically (↑ ↓), or diagonally (↖ ↘), either forwards (→/fɔ:wədz/→) or backwards (←\zdəwkæb\←). Be aware that in the puzzle there are also several phonetic misspellings of the words that are designed to trick you, so make sure that you circle only the correct spellings of the words as they sound. Answers are on page 73.

Phonetic Anagrams One

Phonetic anagrams are words whose phonetic letters can be rearranged to form other words. For example, the word "nice" /naɪs/ is a phonetic anagram of the word "sign" /saɪn/ because the phonetic letters /n/, /aɪ/, and /s/ in the word /naɪs/ can be rearranged to form the letters /s/, /aɪ/, and /n/ in the word /saɪn/. In the following puzzle you are given fifteen phonetic letters and fifteen clues divided into groups of three. Find the answer to clue 1 using three of the phonetic letters in the list. Write the three phonetic letters in the three spaces to the right of the clue, and then write out the word in English in the space to the right of the phonetic spelling. Then to answer clue 2, rearrange the three letters you used in your first answer to form a phonetic anagram. To answer clue 3, rearrange the three phonetic letters you used in 1 and 2 one more time to form a third phonetic anagram that fits the clue. Cross the three phonetic letters that you used off the list, and repeat these steps for answers 4–6, 7–9, 10–12 and 13–15. When you have finished, you should have five sets of phonetic anagrams and all fifteen phonetic letters crossed off the list. Answers are on page 78.

Phonetic Anagrams Three

Phonetic anagrams are words whose phonetic letters can be rearranged to form other words. For example, the word "nice" /naɪs/ is a phonetic anagram of the word "sign" /saɪn/ because the phonetic letters /n/, /aɪ/, and /s/ in the word /naɪs/ can be rearranged to form the letters /s/, /aɪ/, and /n/ in the word /saɪn/. In the following puzzle you are given fifteen phonetic letters and fifteen clues divided into groups of three. Find the answer to clue 1 using three of the phonetic letters in the list. Write the three phonetic letters in the three spaces to the right of the clue, and then write out the word in English in the space to the right of the phonetic spelling. Then to answer clue 2, rearrange the three letters you used in your first answer to form a phonetic anagram. To answer clue 3, rearrange the three phonetic letters you used in 1 and 2 one more time to form a third phonetic anagram that fits the clue. Cross the three phonetic letters that you used off the list, and repeat these steps for answers 4–6, 7–9, 10–12 and 13–15. When you have finished, you should have five sets of phonetic anagrams and all fifteen phonetic letters crossed off the list. Answers are on page 79.

Phonetic Anagrams Four

Phonetic anagrams are words whose phonetic letters can be rearranged to form other words. For example, the word "style" /staɪl/ is a phonetic anagram of the word "slight" /slaɪt/ because the phonetic letters /s/, /t/, /aɪ/, and /l/ in the word /staɪl/ can be rearranged to form the letters /s/, /l/, /aɪ/, and /t/ in the word /slaɪt/. In the following puzzle you are given twenty phonetic letters and fifteen clues divided into groups of three. Find the answer to clue 1 using four of the phonetic letters in the list. Write the four phonetic letters in the four spaces to the right of the clue, and then write out the word in English in the space to the right of the phonetic spelling. Then to answer clue 2, rearrange the four letters you used in your first answer to form a phonetic anagram. To answer clue 3, rearrange the four phonetic letters you used in 1 and 2 one more time to form a third phonetic anagram that fits the clue. Cross the four phonetic letters that you used off the list, and repeat these steps for answers 4–6, 7–9, 10–12 and 13–15. When you have finished, you should have five sets of phonetic anagrams and all twenty phonetic letters crossed off the list. Answers are on page 79.

Phonetic Missing Letter One – Consonants

Below you have the phonetic spellings of 24 words. However, each phonetic spelling is missing its middle letter. The 24 missing letters, which are all consonants, are listed above the 24 words. Your task is to put the 24 letters from the list back into the empty spaces to form the 24 words. However, each phonetic symbol on the letter list can be used only once, so if you use the symbol /θ/ in one word, you cannot use it in another. Cross out the letters as you use them. When you have found the right letters for all 24 words, write the English spellings of the words on the lines to the right. Answers are on page 81.

Phonetic Syllaballistic One – Downtown

Below you will find the phonetic spellings of 20 city places. However, the phonetic spellings of these 20 places have been broken up into 56 phonetic syllables. Your goal is to connect the syllables to rebuild all 20 city places. The number of blanks after each number (1–20) will tell you how many phonetic letters you need to spell the word. The parentheses () will tell you the number of syllables the word has. For instance, in answer 1 you are looking for a two syllable word that is spelt with four phonetic letters. Every syllable on the list must be used, but used only once, so cross out the syllables as you use them. When you are finished, write out the English spellings of the words in the spaces to the right. Answers are on Page 87.

Phonetic Codebreaking One – Numbers

In this puzzle, you have been given a list of twenty numbers between zero and a hundred. The numbers have been written out in phonetic letters, but in a code in which each phonetic letter of the numbers' true phonetic spellings has been replaced with another phonetic letter. For instance, the four phonetic letters in first code word, "pdæg", stand for four other phonetic letters which form the real phonetic spelling of a number. The code will be the same for all of the words on the list. Thus the "p" letter in "pdæg" will stand for the same letter that the "p" letter in the fifth word does, and so on. Your task is to solve the code and discover the names of the numbers on the list. Write the correct phonetic spellings of the numbers in the blanks under the Phonetic Spelling column. Then write the spellings of the numbers in English in the third column. Answers are on page 92.

Phonetic Codebreaking Two – Colours

In this puzzle, you have been given a list of twenty colours. The names of the colours have been written out in phonetic letters, but in a code in which each phonetic letter of the colours' true phonetic spellings has been replaced with another phonetic letter. For instance, the three phonetic letters in first code word, "ŋaʊtʃ", stand for three other phonetic letters which form the real phonetic spelling of a colour. The code will be the same for all of the words on the list. Thus the "ŋ" letter in "ŋaʊtʃ" will stand for the same letter that the "ŋ" letter in the sixth word does, and so on. Your task is to solve the code and discover the names of the colours on the list. Write the correct phonetic spellings of the colours in the blanks under the Phonetic Spelling column. Then write the spellings of the colours in English in the third column. Answers are on page 93.

Phonetic Codebreaking Three – Family Members

In this puzzle, you have been given a list of nineteen family members. The names of the family members have been written out in phonetic letters, but in a code in which each phonetic letter of the family members' true phonetic spellings has been replaced with another phonetic letter. For instance, the three phonetic letters in first code word, "i:lɒ", stand for three other phonetic letters which form the real phonetic spelling of a family member. The code will be the same for all of the words on the list. Thus the "l" letter in "i:lɒ" will stand for the same letter that the "l" letter in the third word does, and so on. Your task is to solve the code and discover the names of the family members on the list. Write the correct phonetic spellings of the family members in the blanks under the Phonetic Spelling column. Then write the spellings of the family members in English in the third column. Answers are on page 94.

Phonetic Codebreaking Four – Parts of a House

In this puzzle, you have been given a list of twenty areas in and outside the house. The names of the areas have been written out in phonetic letters, but in a code in which each phonetic letter of the parts' true phonetic spellings has been replaced with another phonetic letter. For instance, the five phonetic letters in second code word, "gdɜ:dw", stand for five other phonetic letters which form the real phonetic spelling of a house part. The code will be the same for all of the words on the list. Thus the "g" letter in "gdɜ:dw" will stand for the same letter that the "g" letter in the third word does, and so on. Your task is to solve the code and discover the names of the house parts on the list. Write the correct phonetic spellings of the house parts in the blanks under the Phonetic Spelling column. Then write the spellings of the house parts in English in the third column. Answers are on page 95.

Phonetic Codebreaking Five – Sports

In this puzzle, you have been given a list of twenty-three sports. The names of the sports have been written out in phonetic letters, but in a code in which each phonetic letter of the sports' true phonetic spellings has been replaced with another phonetic letter. For instance, the six phonetic letters in second code word, "ghɒfɜ:k", stand for six other phonetic letters which form the real phonetic spelling of a sport. The code will be the same for all of the words on the list. Thus the "g" letter in "ghɒfɜ:k" will stand for the same letter that the "g" letter in the third word does, and so on. Your task is to solve the code and discover the names of the sports on the list. Write the correct phonetic spellings of the sports in the blanks under the Phonetic Spelling column. Then write the spellings of the sports in English in the third column. Answers are on page 96.

The phonetic symbols above the grid go in the blank spaces of the columns directly below them (↓), but not necessarily in the order in which they appear. Put the phonetic symbols in the proper spaces below them in order to form words which can be read from left to right (→). A black square will show where each word ends. When you have put the phonetic symbols in their correct spaces, you will be able to read the phonetic transcription of a famous quote which you should then write out on the line below the puzzle. Answers are on page 98.

Directions for Phonetic Kriss Krosses

In each of the following Phonetic Kriss Kross puzzles, you will find a list of words related to a particular theme, such as jobs, countries, or musical instruments. Next to the words on the list are spaces for you to write out the phonetic spellings of the words. After you have written out the words' phonetic spellings, place these phonetic spellings in the grid at the top of the page so that the words intersect, as in the following example:

Wintertime

Word List

icicle	/	'aɪsɪkl	/	skiing	/	'ski:ɪŋ	/
skating	/	'sketɪŋ	/	sleigh	/	'sleɪ	/

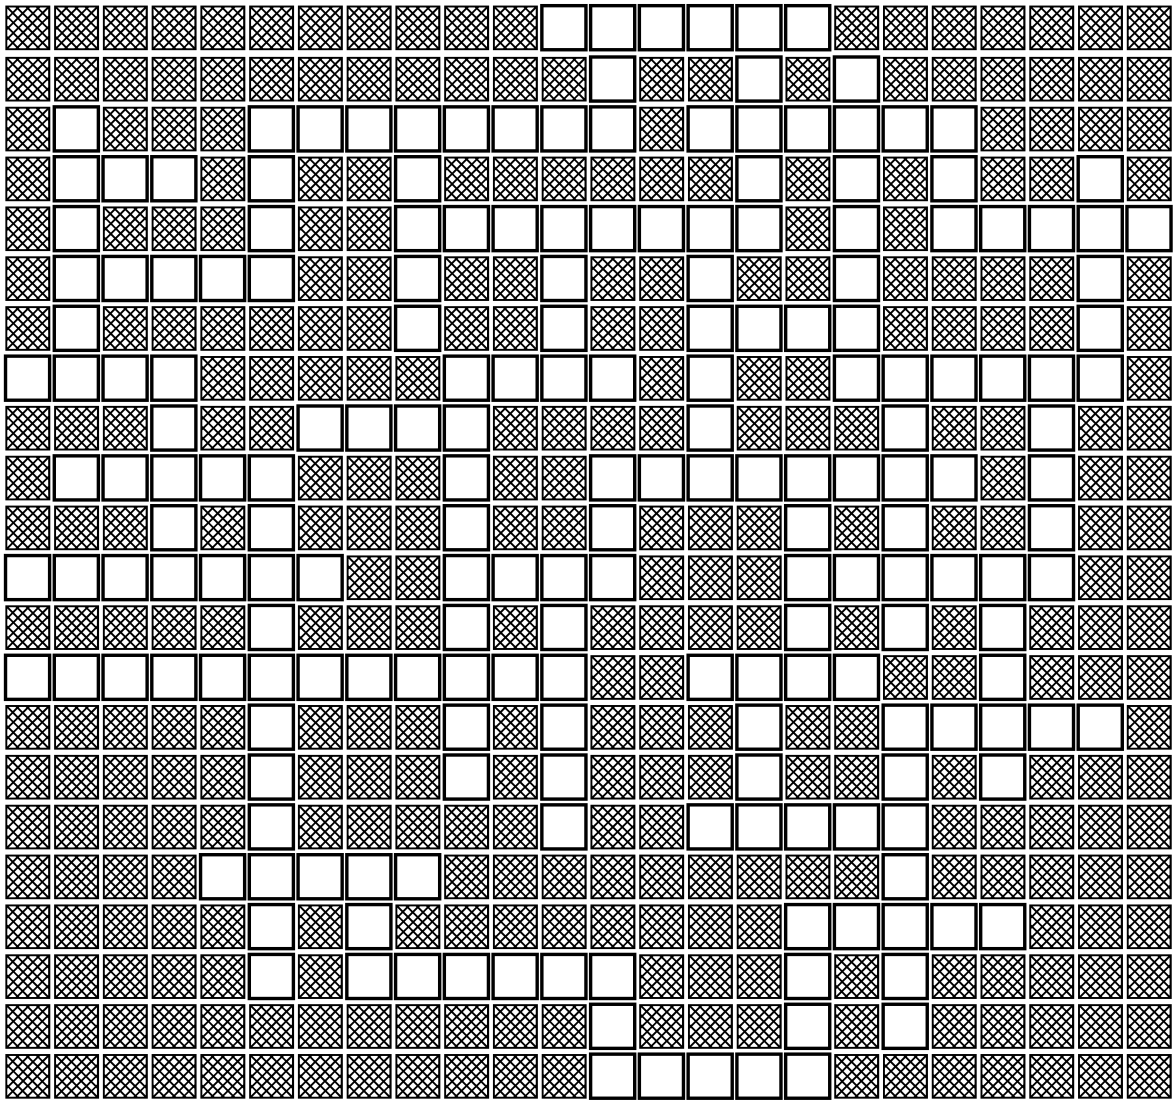

Some tips:

If you are unsure of the phonetic spelling of a word, start with the consonants. You may be able to find the phonetic spelling's place on the grid using just those letters, while the words that intersect with it on the grid may give you some idea what the letters you are unsure of should be.

Pay attention to the number of phonetic letters it takes to spell a word when searching for its place on the grid. For instance, if you find that only one word on the list is spelt with ten phonetic letters, then there should only be one ten-blank row or column on the grid for the word to be placed.
